## EXPERIENCE

### VentureDive, Lahore — *Software Engineer*

July 2019 - PRESENT

- Designed database model with backend team for distribution management system and worked on it as a front-end engineer.
- Developed a UX extensive website using HTML, CSS and Vanilla Javascript.
- Improved code quality with SonarQube as an analyser.
- Gained end-to-end view of development as scrum master after training as a business analyst. (Used Jira)

### VentureDive, Lahore — *Associate Software Engineer*

June 2018 - June 2019

- Worked with a team of 30 people(including remote), on front-end using React to make a diabetes management application called Droobi for Qatar government.
- Engaged with a large team of 20 people (including business analysts, quality software engineers, and software engineers) to develop a challenging application of supply chain management using agile software development.
- Started working as a full stack developer to understand the bigger picture.

### Plan9 (Incubator), Lahore — *Interns Coordinator & Teacher*

June 2016 - July 2016

- Taught web development to 12-15 years olds at a summer camp.
- Coordinated interns at a startup cup.

## EDUCATION

### GIK, Pakistan — *BS in Computer Science*

August 2014 - June 2018 | CGPA: 3.44/4.00

## PROJECTS

### Be My Eye— *Smart cane for visually impaired*

- Final year thesis in mobility.
- Made mobility of an unsighted easier using obstacle detection and GPS navigation system through speech recognition and synthesis.
- This project required extensive research, development and documentation leading our group to secure 2nd position.

### On Your Way - *To-do list based on location*

- Personal project using MERN stack. (MongoDB, Express.js, AngularJS, and Node.js)
- Reminds user to do a task if he is in 5 km radius of task's location.

### Sawari Number 9 - *On-campus ride sharing*

- Project for Databases course to facilitate mass transit sharing.
